

EXIDE[®]

TECHNOLOGIES

BATTERIES

Exide is a global leader in battery manufacturing. With the latest technology, it offers the highest quality European aftermarket and OE products. **Exide works with leading car manufacturers including:** Audi, Mazda, Porsche, Toyota, Volkswagen, Volvo.

NEW!

In the EXIDE product range, we offer the following battery lines:

- **AGM** – ideally suited to cars with START-STOP systems, also designed as a 12V power source for systems supporting safety functions in electric cars.
- **EFB** – perfectly compatible with the START-STOP system and other fuel-saving functions, offering much better charge acceptance and longer life in cycling operation.
- **Premium** – equipped with Carbon Boost 2.0 technology ensuring up to 2 times faster charging. Designed for vehicles that are intensively used and have a rich equipment of electrical receivers.
- **Excell** – adapted to the majority of modern cars with standard equipment for everyday use, they feature 3DX grid technology for better electrical performance and longer life.
- **AGM Auxiliary** – is a line of batteries complementing the main starter battery, supporting additional car equipment (including the START-STOP system).

Available Exide batteries and their parameters.
