

DUAL MASS FLYWHEELS

and SRLine clutch kits with dual mass flywheels

Increasing engine power and higher expectations of drivers concerning driving comfort have forced manufacturers to use alternative solutions. Without any doubt such a solution is dual mass flywheel (DMF). Although it is a solution that improves the culture of the drive unit, it is not flawless and sometimes is prone to failure. In case of need for replacement, it is worth taking advantage of SRLine's high quality products. In the range of dual mass flywheels, **SRLines offer includes dual mass flywheels and complete clutch kits with dual mass flywheel.**

SRLine dual mass flywheels and clutches meet strict quality and environmental standards:

- IATF16949,
- ISO14001,
- ISO45001.

SRLine clutch kits with dual mass flywheel are, depending on the car model, complete kits containing:

- dual mass flywheel,
- release bearing or concentric slave cylinder,
- screw kits.

Available SRLine clutch kits with dual mass flywheel and dual mass flywheel.

Polcar number	Example application	LUK number
Flywheel		
S31-DK001	Audi A3 (8P), 03-12	415025010
